Profile

I build the internal software a pharmacy network of dozens of branches runs on: backend APIs, monitoring command centres, centralised access control, data pipelines, and bots that answer operational questions in plain language. I start from the process and the person doing it, find the bottleneck, and ship something that survives a real shift.

Experience

Infrastructure and senior developer

Feb 2025 — present

Farmácias Estrela

- Built Nexus, the network's command centre: near real-time branch telemetry, browser SSH, gated remote actions, and a Telegram bot that mirrors both.
- Designed and shipped Farmácia Auth — centralised roles, permissions, JWT API, and an audit trail — now covering roughly 70% of the network.
- Automated the e-commerce image pipeline end to end: ERP gap detection, barcode scrapers, an approval queue, a MinIO catalogue, and automatic publishing.
- Built a natural-language-to-SQL assistant over the ERP, modelling the database as a linked-note knowledge graph so the team queries it from Telegram.

Analyst and support — data centre

Nov 2023 — Feb 2025

Unioeste

- Kept institutional systems available: uptime, incident response, and technical support for internal users.
- Networking, Active Directory, and continuous work on the university's server environment.

Social media

Jan 2023 — Nov 2023

EletroLimp

- Ran the brand's content operation: posting methodology, paid boosting, and the marketing CRM.
- Produced the visual components that went into the company's website and internal system.

UI freelancer

Sep 2022 — Aug 2023

Workana

- UI and UX freelancing for clients: Figma prototypes, interfaces, and supporting copy.

Education

Skills

Backend and APIs

Node.js · Python · REST · JWT · SQL Server · PostgreSQL · MongoDB · MinIO

Frontend

TypeScript · React · Vite · Next.js · Tailwind CSS · shadcn/ui · i18next

Data and AI

SQL · NL → SQL · LLMs · Obsidian knowledge graphs · Excel/PDF reporting

Infrastructure

Windows Server · Active Directory · Linux · Docker · Coolify · Nginx · PowerShell

Automation

n8n · Telegram bots · Playwright scrapers · Webhooks · Scheduled jobs · CLI installers

Selected systems

- **Nexus Estrela** Infrastructure command centre with browser SSH and a Telegram operator bot.
- **Farmácia Auth** Centralised roles, permissions, and audited access for internal systems.
- **E-commerce image pipeline** Barcode-driven scraping, approval queue, and automatic publishing.
- **DBA specialist bot** Natural-language questions answered as SQL, lists, or spreadsheets.

Awards and competitions

- FAG hackathons — podium finishes at Show Rural Digital, including third place in 2024.
- Eureka robotics fairs — FEBRACE 2021, Infomatrix (Mexico), third place at Fenecit 2020, FETEC-SP.
